CS471 – Web Technologies (Laboratory)	Qassim University College of Computer	Lab 5
		HTML and CSS (Part 2)

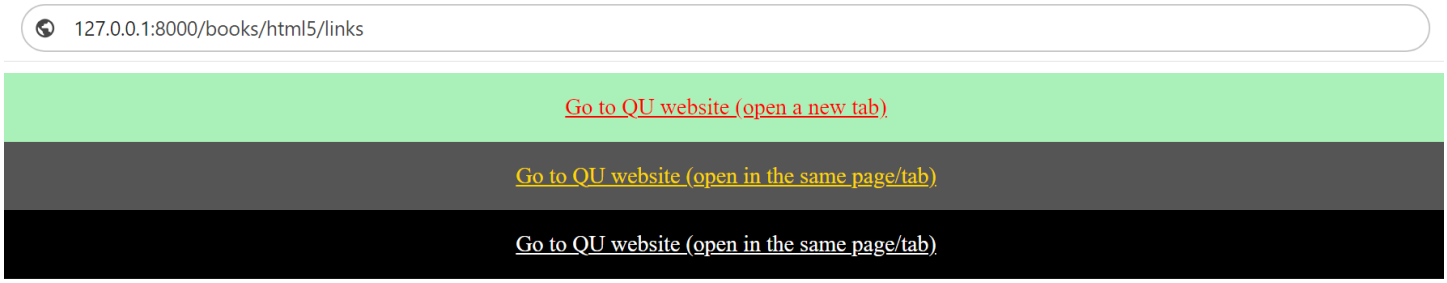
This lab session covers additional HTML and CSS Fundamentals (part2). By the end of this session, students should have a very good understanding of how to integrate links, text formatting, lists, and tables into arbitrary webpages with static files in Django framework.

Pre-lab Preparation:

1. Having bookmodule and usermodule in apps directory, each containing separate URL configurations.
2. Template directory located in 'apps' with necessary settings.

Lab Activities:

Task 1: (Links and layout customization) Create a page with the URL '/books/html5/links' to display the following. You should use external CSS (main.css) with class and id for styling purposes (having padding, text center, text color, background color, and display as a block). Also, you should add different styles to each state, which a link can have, such as visited, hover, and action.



```
{% load static %} <!DOCTYPE html>
<html>
<head>
    <title>Links</title>
    <link rel="stylesheet" href="{% static 'main.css' %}">
</head>

<body>

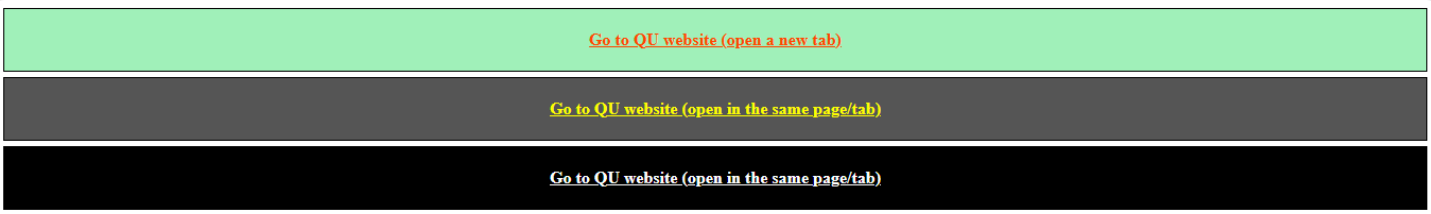
<div class="link1">
<a href="https://qu.edu.sa" target="_blank">
```

```
Go to QU website (open a new tab)
</a>
</div>

<div class="link2">
<a href="https://qu.edu.sa">
Go to QU website (open in the same page/tab)
</a>
</div>

<div class="link3">
<a href="https://qu.edu.sa">
Go to QU website (open in the same page/tab)
</a>
</div>

</body>
</html>
```



Task 2: (Text formatters (nested formatters)) Create another page with the URL '/books/html5/text/formatting' to display the following. You may use the external CSS file 'main.css' to add style for the h1 tag that contains 'Example of Formatting tags'

127.0.0.1:8000/books/html5/text/formatting

Example of Formatting tags

This text has **subtext** using b tag

This text has **subtext** using strong tag

This text has *subtext* using i tag

This text has *subtext* using emphasize tag

This text has subtext using small tag

This text has subtext using mark tag

This text has ~~subtext~~ using del tag

This text has subtext using ins tag

This text has $X_{subtext}$ using sub tag

This text has $X^{subtext}$ using sup tag

Example of Formatting tags

This text has **subtext** using b tag

This text has **subtext** using strong tag

This text has *subtext* using i tag

This text has *subtext* using emphasize tag

This text has subtext using small tag

This text has subtext using mark tag

This text has ~~subtext~~ using del tag

This text has subtext using ins tag

This text has $X_{subtext}$ using sub tag

```
{% load static %}
<!DOCTYPE html>
<html>
<head>
    <link rel="stylesheet" href="{% static 'main.css' %}">
</head>
```

```
<body>
    <h1 class="lab-header">Example of Formatting tags</h1>
    <div class="format-box">
        <p>This text has <b>subtext</b> using b tag</p>
        <p>This text has <strong>subtext</strong> using strong tag</p>
        <p>This text has <i>subtext</i> using i tag</p>
        <p>This text has <em>subtext</em> using emphasize tag</p>
        <p>This text has <small>subtext</small> using small tag</p>
        <p>This text has <mark>subtext</mark> using mark tag</p>
        <p>This text has <del>subtext</del> using del tag</p>
        <p>This text has <ins>subtext</ins> using ins tag</p>
        <p>This text has X<sub>subtext</sub> using sub tag</p>
        <p>This text has X<sup>subtext</sup> using sup tag</p>
    </div>
</body>
</html>
```

Task 3: (Listing (nested)) Create a third page with the URL '/books/html5/listing' to display the following. You may also add style to the external CSS file 'main.css'

127.0.0.1:8000/books/html5/listing

The Best Features of the Internet

- You can meet new people from countries around the world.
- You have access to new media as it becomes public:
  - New games
  - New applications
    1. For business
    2. For pleasure
  - Around the clock news
  - Search engines
  - Shopping
  - Programming
    1. XML
    2. Java
    3. HTML5
    4. JavaScript
    5. New languages
- Links
- Keeping in touch with old friends
- It's the technology of the future!

        </li>
        <li>Links</li>
        <li>Keeping in touch with old friends</li>
        <li>It's the technology of the future!</li>
    </ul>

</body>
</html>
```

Task 4: (Tables and layout customization) Create a fourth page with the URL '/books/html5/tables' to display the following. You may also add any necessary style to the external CSS file 'main.css'.

127.0.0.1:8000/books/html5/tables

Table 1: Table of Fruits and Their Prices

Fruit	Price
Apple	$0.25
Orange	$0.50
Banana	$1.00
Pineapple	$2.00
Total	**$3.75**

Table 2: A more complex sample table

	Camelid comparison Approximate as of 6/2011			
	# of humps	**Indigenous region**	**Spits?**	**Produces wool?**
Dromedary	1	Arabian Peninsula	Yes	Yes
Camels (bactrian)	2	Africa/Asia	Yes	Yes
Llamas	1	Andes Mountains	Yes	Yes

Task 4: Tables

Table 1: Table of Fruits and Their Prices

Fruit	Price
Apple	$0.25
Orange	$0.50
Banana	$1.00
Pineapple	$2.00
Total	**$3.75**

Table 2: A more complex sample table

	Camelid comparison Approximate as of 6/2011			
	# of humps	Indigenous region	Spits?	Produces wool?

Pineapple	$2.00
Total	**$3.75**

Table 2: A more complex sample table

	Camelid comparison Approximate as of 6/2011			
	# of humps	Indigenous region	Spits?	Produces wool?
	1	Arabian Peninsula	Yes	Yes
	2	Africa/Asia	Yes	Yes
Llamas	1	Andes Mountains	Yes	Yes

```
{% load static %}
<!DOCTYPE html>
