

CS471 – Web Technologies (Laboratory)		Lab 12
		Django Contrib Package

This lab session covers Django Contrib Package (admin, sessions and messages). By the end of this session, students should have a very good understanding of how to use these packages.

Pre-lab Preparation:

1. Pages of the previous lab.
2. Add the necessary contrib packages in settings.py

Lab Activities:

Task 1: Create a register page with a URL '/users/register' with any necessary HTML files and view functions.

```
def register_view(request):
    if request.method == "POST":
        form = UserCreationForm(request.POST)
        if form.is_valid():
            form.save()
            messages.success(request, "You have successfully registered!") # Task 5
            return redirect('login')
    else:
        form = UserCreationForm()
    return render(request, 'users/register.html', {'form': form})
```

[Login](#) | [Register](#)

Register Page (Task 1)

Username: Required. 150 characters or fewer. Letters, digits and @/./+/-/_ only.

Password:

- Your password can't be too similar to your other personal information.
- Your password must contain at least 8 characters.
- Your password can't be a commonly used password.
- Your password can't be entirely numeric.

Password confirmation: Enter the same password as before, for verification.

Task 2: Create a login page with a URL '/users/login' with any necessary HTML files and view functions.

```
def login_view(request):
    if request.method == "POST":
        form = AuthenticationForm(request, data=request.POST)
        if form.is_valid():
            user = form.get_user()
            login(request, user)
            messages.success(request, "Login successful !") # Task 5
            return redirect('student_list')
        else:
            messages.error(request, " Invalid username or password ") # Task 5
    else:
        form = AuthenticationForm()
    return render(request, 'users/login.html', {'form': form})
```

[Login](#) | [Register](#)

You have successfully registered!

Login Page (Task 2)

Username:

Password:

Login

Task 3: Apply login permission to the previous lab. If the user is not logged in, redirect the user to the login page.

```
from django.contrib.auth.decorators import login_required

@login_required(login_url='/users/login')

def student_list(request):
    students1 = Student.objects.all()
    students2 = Student2.objects.all()
    return render(request, 'bookmodule/student_list.html', {
        'students1': students1,
        'students2': students2
    })
```

[Login](#) | [Register](#)

Login Page (Task 2)

Username:

Password:

Welcome, محمد | [Logout](#)

Login successful!

Task 1: One-to-One Students

[+ Add Student \(Task 1\)](#)

Name	Age	Address	Actions (Update/Delete)
amar	22	Riyadh,	Update Delete
salah	40	Qassim ,	Update Delete
sara	13	Riyadh,	Update Delete

Task 2: Many-to-Many Students

[+ Add Student \(Task 2\)](#)

Name	Addresses	Actions (Update/Delete)
Rola	Riyadh	Update Delete
sara	Riyadh, Jeddah	Update Delete
amar	Jeddah, Dammam	Update Delete

[Go to Gallery \(Task 3\) →](#)

Task 4: Add a link '/users/logout' to sign out users to all pages where the user is logged in.

```
def logout_view(request):
    logout(request)
    messages.info(request, "Logged out successfully .") #task5
    return redirect('login')
```

CS471 – Web Technologies (Laboratory)		Lab 12
		Django Contrib Package

[Login](#) | [Register](#)

Logged out successfully.

Login Page (Task 2)

Username:

Password:

Login

Task 5: Provide messages to users, like, 'you have successfully registered', 'login successfully', or 'error message.'
